## Becoming Manifest Transformation

### Translated from Hebrew of Genesis

#### Chapter One

1. The underlying Foundation is Consciousness.
2. Consciousness invokes definition of its parts.
3. Contracted movement in Original Will manifests the defined creation. Gen 1:1
4. The act of defining creates a duality and viable poles.
5. The relationship between the consciousness and the defined creates a gravitational/relation field. This field is a unique multi-dimensional phenomenon called space and is here after referred to as the Vessel.
6. Orbit and spin are a result of poles.
7. The ultimate result of motion is the sphere.
8. Expansion and Contraction within the Sphere creates the Torus, the vessel.
9. At the center of the Torus is the Void, or Original Source.
10. Width of the Torus tube is focus Beth = 2 , the redefined poles.
11. The width of the overall Torus structure is the defined expansion. Lamed = 30.
12. Consciousness = Heh = 5 = contraction (2) plus expansion (30 sans zero = 3)  $2+3=5$

13. The **Volume** of this torus is the culmination of conscious original movement or *conscious*  $\aleph$  (5)

*Original*  $\aleph$  (1) movement's  $\aleph$  (200) culmination  $\aleph$ (90). H' Aretz - Earth = 296 (Gen 1:1)

Torus volume =  $2 \times \pi^2 \times \text{Radius of the orbit} \times \text{radius of the tube squared}$ .  
=  $2 \times (3.1415 \times 3.1415) \times 15 \times (1 \times 1) = 296$  (I assume that 'earth' refers to the range of frequencies humanity is acclimated to at this time.)

14. The **Surface** of this torus is the culmination of the receptivity (mem yod mem) of humanity or 592 or *Receptivity*  $\beth$  '  $\beth$  (90) evolving  $\beth$  (6) humanity's  $\aleph$   $\aleph$   $\aleph$  (406) culmination  $\aleph$  (90)

Torus surface area =  $4 \times \pi^2 \times R \times r$  where r is the radius of circle beth's focus'  $2/2=1$  and R is radius of large circle lamad "expansion" =  $30/2 = 15$ . =  $4 \times (3.1415 \times 3.1415) \times 15 \times 1 = 592$

15. Focusing to the center vitalizes Will's seed, expanding into the individual manifested. Gen 1:2

Verse 1:3 Kether, thought's fire - Exothermic process or reaction that releases energy from the system to its surroundings

Verse 1:4 Light and reunification. Abundance and discernment

Verse 1:5 Exothermic process manifests Vessel and Soul. Thought (internalized sound) discovers the Origin's abundance

Torus in Genesis 1:1

This is my translation of the first verse of Genesis. The torus is defined by the internalizing/expansion pattern which is continued in the next few verses. The numerics give added justification to this pattern.

**Focused** movement in Original Will Manifests defined creation.( B'raseth)

Original **Expanded** consciousness manifests the vessel

Torus motion: Original Will moves. It's movement corresponds to it's nature, which is to contract (beth=2). This circular movement develops a pattern of a torus which is the expansion (lamad=30) into a blossom, from 2 dimensions to 3 (or more). This 3 (or more) dimensional reality is the vessel.

**Genesis 1:1** Focused movement in Original Will manifests the defined creation. Original Expanded consciousness Manifests the vessel. Original defined consciousness wills vessel's manifestation. Vessel becomes humanity's Origin moving to culmination.

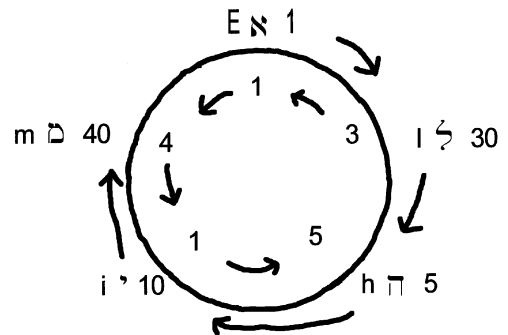

'Focus  $\beth$  (2) movement  $\beth$  (200) Original  $\aleph$  (1) will  $\omega$  (300) manifest  $\beth$  (10) define  $\beth$  (400) create  $\aleph$   $\beth$   $\beth$  (203) Original  $\aleph$  (1) expansion  $\beth$  (30) consciousness  $\beth$  (5) manifest  $\beth$  (10) vessel  $\beth$  (40) Original  $\aleph$  (1) define  $\beth$  (400) consciousness  $\beth$  (5) will  $\omega$  (300) Vessel  $\beth$  (40) manifest  $\beth$  (10) Vessel  $\beth$  (40) becoming  $\beth$  (6) humanity  $\beth$   $\beth$   $\aleph$  (406) Original  $\aleph$  (1) movement  $\beth$  (200) culmination  $\beth$  (90)

*Contracted movement in Original Will manifests the defined creation. The Original Expanded consciousness manifests as the vessel. As the Origin's consciousness is defined so is the vessel manifested. Vessel is the womb of humanity moving to culmination.*

The Original Will, through movement, manifests the defined creation. This consciousness expands into the vessel of our existence. We live and culminate within the vessel. Original Will manifests humanity based on the original consciousness.

“Manifest (10) vessel (40) Origin (1) defined (400)” sans zeros = 1414 or 1.414, the square root of 2. Manifest vessel is equal to the Origin defined. The relationship between two equal sides of a square is the square root of two. Origin defines Origin and thus creates a duality reality. The relationship between the self and the knowing of the self is defined mathematically by the square root of two. This duality can also be a reflection of the expansion/focusing action in the torus. These similar but opposite poles creates the tension to keep the motion going.

Original (1) expanded (30) consciousness (5) manifests (10) vessel (40) is Elohim, the first God name in Genesis. Writing the name clockwise around a circle then starting with the Lamad and going counter-clockwise around a circle gives us Pi 3.1415. Aligning this name with the circle gives it a feminine connotation as well as the primary concept of form, womb etc. 'Eloh' is a feminine noun; 'im' is a masculine plurality. The resulting balance of masculine and feminine fertilizes and creates.

d'Olivet gives Beth the meaning of: paternal, virile, interior and active action. The Lexicon says it means: at, in, abide, stay, in the presence of, the same, expresses the quality or manner in which a thing shows itself, together with, the value of. So I translate it as 'focus' referring to the action of returning to the interior.

Heh is defined by d'Olivet as : universal life, breath , air, spirit, soul, that which is animating, vivifying. Heh becomes 'consciousness': This puts the action in a human perspective. In these first verses it refers to the original consciousness without which nothing is.

d'Olivet defines Mem as: woman, another, productive, creative, maternal exterior and passive action, local, plastic, collective developing the being in infinitive space, as far as its nature permits or uniting by abstraction in one single being all those of the same kind. I feel comfortable recognizing both Vessel and Universe as wombs of humanity. Vessel is the womb of primary Will and Universe is the womb we make for ourselves. Time, Space, individual separation are all mental constructs. When

all 'individuals' act as a single unit, (which happens a lot more often than you may think), then the 'laws' of nature are established or strengthened.

**1:2 Evolving Determined Movement Culminated (H'Aretz), existence characterizes defined consciousness evolving. Evolving focus, potential becomes vitalized Will's seed. Sound expands the speech of the individual manifested. Defined potential vessel focuses movement evolving vital Elohim. Vessel moves vital speech of defined substance expressing conscious receptivity.**

Evolving 1 (6) H'Aretz א ב ג ד (296) existence ו ז (15) character ח ט (405) define י (400) consciousness י (5) Evolving 1 (6) Evolving 1 (6) focus כ (2) potential ל (11) Evolving 1 (6) vital מ (8) Will נ (300) seed ס (20) sound ע (70) expansion פ (30) speech צ (80) Individual ק (50) manifest ר (10) define ט (400) potential י (11) Vessel י (40) Evolving 1 (6) movement י (200) Evolving 1 (6) vital מ (8) Original Expansion Existing vessel (Elohim) פ (86) Vessel ק (40) movement ר (200) vital מ (8) speech צ (80) define ט (400) substance ע (100) expression ו (140) consciousness י (5) receptivity י (90)

1:2 evolving **focus**, potential becomes vitalized Will's seed.

Sound expands the speech of the individual manifested. Defined potential Vessel evolves movement evolving vital Elohim.

*Earth (H'aretz or the finished physical form) reveals the character of the process of the conscious Original. In order for Original Will's seed to become vitalized, imbued with life, the potential must be focused, or brought deep in the Self. The nature of individual expression (speech or formed sound) comes directly from the nature of Sound. The movement of the vessel vitalizes the Creator Gods. Movement (frequency) is the vital speech defining the substance that is the expression of conscious Receptivity.*

Original Will can be visualized as the Father. The vessel in which the Will moves and awakens can be understood as the Vessel or Mother. The Fulfilled Will has the same character as the Original Will. The power comes from the expansion and awakening and the form comes from the focusing. Think of a torus; expansion, contractionizing, expansion, contractionizing. Expansion (30) contractionizing (2) = 32 = the coalescence א ב ג ד the flux, the wave, the primum mobil that defines the 'physical' result of the vibration of sound. Notice that in the first sentence you have, in order א ב (determined) ג ד (existence) א ב (potential). The coalescence, only inverted as if it were the receptive coalescence rather than the active one.

Vital means absolutely necessary or important; essential; or full of energy; lively. I use it in the second sense as in lively or full of life or full of the essence of living. For instance potential is just possibility until it is focused then it becomes vitalized. An idea is just an idea until it is embraced then it can change a life. The series of events described in Genesis is not necessarily a long time ago the Original Will did this then that happened then . . . All of the events described happen now on any

scale whatever – Universal, personal, imaginative. All of this is not subject to time or space or object. It is the Pattern.

‘Evolving Determined Movement Culminated (H'Aretz), existence characterizes defined conscious evolution.’ The final result is represented in the process of it’s becoming.

‘Becoming focus, potential becomes vitalized Will's seed.’ Once the goal is realized it is focused and produces the seed of that goal.

‘Sound unfolds the speech of the individual manifested.’ Original Will, as well as the individualization of each aspect of the Will, has created the seed of it’s fulfillment. In-bedded in this seed is the speech, the formulation of sound, into the words that invoke the goal.

‘Defined potential Vessel becoming movement becomes vital Elohim’. When the potential Vessel(the vessel, be it the universe or the fetus) starts moving (as in the Primum Mobil, the focused seed traveling outward into the torus shape) then it enlivens the Will that conceived it. As the last sentence states, the vital speech expresses this very receptivity. (Every movement is a ritual. Every word is an invocation.)
