

Mathematical Analysis of Genesis

Dianna Padgett

Introduction

I no longer believe that Moses wrote Genesis. I think it was an ancient text he, or someone, translated. And it wasn't a manuscript of words but of numeric formula. The Hebraic letters are perfect for this type of translation because the letters represent sounds, numbers and concepts. Giving the letters the added ability to evolve ensured a flexible and dependable tool for spiritual growth. I'm not saying that this is the best way or the only interpretation. But this is my tool that produces this result at this point in time. I will say, however, that a flexible tool for growth has proven superior, for me, than a rigid one.

As the meanings of the letters evolved the text became more coherent. The coalescence of the various spiritual paths and practices brought the underlying truth into sharp focus. Though there are billions of different eyes, we all see. Though there are billions of different nerve endings, we all feel. Perception is one of the underlying qualities of all beings. The other two are consciousness and life. Western scientists try to apply a mechanical theory to these qualities without success.

Verse 1

בְּרֵאשִׁית בְּרֵא אֱלֹהֵי מֵאֵת הַשָּׁמַיִם מוֹאֵת הָאָרֶץ

The first few letters seem to have influenced at least two belief systems. Beth, resh, aleph, shin, yod, tau. The sound of these letters would be 'Ba Ra Sith'. Ba is one of the Egyptian souls that is configured as a bird with the face, the identity, of the deceased that flies from the body upon death. Ra is the Egyptian god of the sun. The sound 'ra' is the identity (Ba) of Ra the 'Perceptive one'. The sun is the primary source of light and, as the vehicle of a key perceptive ability is, therefore, Perception. The sound 'seth' is the identity (Ba) of Seth, the god of chaos, the Will's Manifest Reciprocal. The need to choose is built into the system as bits of chaos/potential to be either rejected or assimilated depending on the individual in it's path. Shakespeare's witches in Macbeth and Iago in Othello are examples of this essential application of chaos. Without them, Macbeth and Othello would not have revealed their true natures by making decisions. Without them, there would be no answer to the one underlying question, Who am I?

The Hebraic B R A has the meaning 'to mirror'. Focused perception of the One.

B R A is also the beginning of the Hindu creator god name, Brahman. 'The Bijhadara-Yaka Upanisad' Translated by Swamima Dhava Nanda section 2.2.1 says: ". . . that from which the universe originates, of which it consists (during continuity), and into which it dissolves is the one Brahman." Basically, all that is, is Brahman.

Verse one contains the following:

A: Mirror

B: Elements

C: Evolution of Nature

D: The nature of Life is revealed through a letter by letter analysis of the name Elohim and has the numerical definition by Pi.

E: One expanded consciousness

F: The evolution of reciprocal consciousness to nature produces the growth standard of Phi.

G: The relationship between mirroring Elohim's One and the accumulative evolution of nature is Phi. Pi times Phi is consciousness.

H: The concepts of Focusing and Expanding mirror the flow of a torus. The volume of this torus is defined as the consciousness of One's perception culminated.

A: The One ‘mirror s’ by focusing perception of itself, expanding it’s consciousness, and willing life. It is the interaction of the question ‘What am I?’ and it’s answer reflecting back mirror’s Nature. Focused (2ב) Perception (200ר) One (1א) = 203 + mirror (203א ר ב) = 406 = Nature (406ה ת א)

The One can be compared to Spinoza’s ‘Substance’ (Ethics 1:D3) or Meister Eckhart’s ‘Ground’, the Qabalistic Ain Soph. ‘The tao that can be told is not the eternal Tao The name that can be named is not the eternal Name.’ (Tao Te Ching – Verse 1). Therefore, I will refer to it as ‘One’ and leave it at that.

This first verse of Genesis states that the One manifests a reflection that is reciprocal. Meaning that it is a reflection or a direct response to the glance of the One in that ‘focused perception One’ are the letters of mirror. The One can focus movement, has will, and has consciousness, albeit these traits are so beyond our definitions of these words that we can only vaguely understand what they mean. The reciprocal reflection, us, nature, is that which perceives, manifests life. Life expresses itself in a time/space defined reality. It is beyond what we can imagine as our universe and covers the expanse of infinite perceivable variation. It is the us, the Elohim, the reciprocal consciousness that wills life. It is defined as being, evolving and accumulative. This whole process is the culmination of One’s Perception (or one (1) Perception).

792 X 2 = 1584 + 1 = 1585;

792+793=1585

Fire/Perception (ר 200) + Air/Consciousness (ה 5) + Earth/Will
(ש 300), = 505; 505 x 3.1415 (form) = 1585

Will, Consciousness and Perception given form as Earth, Air and
Fire = 1585

This state qualified by *Willed Life's Accumulating Evolution* 396
= 1585 / 39.6 = Life/Water (m 40)

The relationship of the distance of earth to moon and earth to sun is 396. The radius of the earth is 396. Life/Water is the outer form of Will, Consciousness and Perception qualified by accumulated evolution.

C: Evolution of Nature

Focused (2ב) Perception (200ר) One (1א) will (300ש)
manifest (10י) reciprocal (400ת) mirror (203א ר ב) One (1א)
expansion (30ל) consciousness (5ה) manifest (10י) life (40מ)

Perceiving (200ר) One (1א) will (300ש) manifests (10י)
 $=2+1+3+1=7$. 7 (in the 'Pure, first level' state) is a prime number
as it has no divisors. The Hebraic letter with the value of 7 is י
Zayin which means Interaction. The sum of 1 through $7=28$.

*reciprocal mirroring, One expands consciousness manifesting
the life of One's reciprocal .* reciprocal (400ת) mirror (203א ר ב)
One (1א) expansion (30ל) consciousness (5ה) manifest (10י)
life (40מ) One (1א) reciprocal (400ת) $4+2+3+1+3+5+1+4+1+4$
 $28 =$. This describes the action of the One, upon viewing it's
reflected aspects, expands its consciousness infusing the
reciprocal with Life, the quality of self aware, expanding
animation. The One Whole can now interact with the One
Individual. Granted, the individual is still part of the One Whole
but, just as we have interactions with aspects of our own sub-
consciousness, the One brings into focus aspects of its being to
further explore its own nature via the free will of Nature. This
first verse of Genesis has 28 letters which accentuates the
importance of this number. 28 is a Perfect number as all of its
divisors added up to the number: $1 + 2 + 4 + 7 + 14 = 28$

$7+28+5=40$ m Life/Water:

The underlying concept of Life is *Perceiving, One wills
Manifestation.* $= 7$

Accumulating all the aspects of 7 produces *reciprocal mirror of
the One expands consciousness manifesting the Life of One's
reciprocal* $= 28$

The underlying concept of Life plus all of it's aspects plus
consciousness (5) becomes Life $= 7+28+5=40$ m Life/Water

The sum of $1 - 28 = 406 =$ *One reciprocal consciousness*
(406π τ κ) = *Nature*.

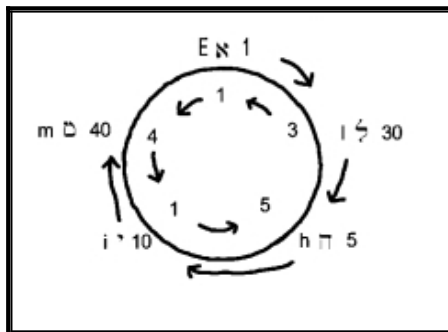

Perceiving, One Will manifests. Perceiving (200γ) One (1κ)
will (300ω) manifests (10 y) = 2+1+3+1=7. The statement
begins with Perceiving. The act of perception initiates movement
and thus vibration which is the elemental form of fire. The
numerical values of the letters that compose this statement
contain 5 zeros, implying that the outcome will have a
Consciousness (5π) (air) that is formed from chaos/potential and
so can create new notes and explore where it wills. It contains
Will (Earth). Will is the strength to be what the individual is; To
be steadfast and strong; to utilize an intersection of Perception
into a cohesive life of individuality rather than a “quintessence of
dust.” This chaotic factor does not bring in something that is not
already in the One but does augment factors not dictated by the
formula, aspects of the One in hiding, both detrimental and
auspicious, that seek to be rectified or utilized. These 3 factors,
Perception, consciousness and will (fire, air and earth) combine to
define the fourth, Life (water).

D: The nature of Life is revealed through a letter by letter analysis of the name Elohim and has the numerical definition by Pi.

Focused (2ב) Perception (200ר) One (1א) will (300ש)
 manifest (10י) reciprocal (400ת) mirror (203א ר ב) One (1א)
 expansion (30ל) consciousness (5ה) manifest (10י) life (40ג)

 (40ג) Accumulation (50 מ y) evolve (6ו) Nature (406ה ת א)
 One (1א) Perception (200ר) culminate (90צ)

Elohim One (1א) expanded
 (30ל) consciousness (5ה)
 manifests (10י) life (40ג) is the
 first God name in Genesis.

Writing the name clockwise
 around a circle then starting with
 the Lamad and going counter-
 clockwise around a circle gives
 us Pi 3.1415. Aligning this name
 with the circle gives it a feminine
 connotation as well as the primary
 concept of form, womb etc.
 'Eloh' is a feminine form; 'im' is a
 masculine plurality. The
 resulting balance of masculine and
 feminine fertilizes and creates.
 It is the expansion of the One's
 consciousness through It's
 interaction with it's own reflection
 that empowers Life. Life has
 form (circle, Pi)

Because of the action of perceiving within the infinite One Will, a new 'thing' is manifested that is interactive with the originator. As the One moves so does the image in the mirror. As the mirror moves different things are reflected. *Focused Perception* = 202 2+2=4; *Reciprocal* = 400. There are 4 elements or 4 distinct qualities of which the reflection is composed. The terms Fire, Water, Air and Earth are used to identify these qualities because of the way they are expressed in our interactive state of 'physicality'. On a different, more philosophical, level these 4

elements would be Fire = Movement / Perception (200᳚), Water = Life/vessel (40᳚), Air = Consciousness (5᳚), and Earth = Will (300᳚).

Manifestation of reciprocal mirror = $10+400+203 = 613$;
 $6+1+3=10$ $1+0=1$ is indicative of the Pure aspect of the Elements.
One Expanded Consciousness Manifests life. One (1᳚)
expanding (30᳚) consciousness (5᳚) manifest (10᳚)
life (40᳚) = Elohim = 86 ; $8+6=14$; $1+4=5 = \overline{11}$ = consciousness.

Elohim introduces a compounding of aspects. There is a consciousness that expands (Consciousness plus Movement). Life sets a boundary and distinguishes a form (Life plus Will). Manifesting denotes time and interaction (Movement plus Will). The elements are becoming compounded. The image in the mirror is expanding into a new dimension of depth or innuendo. Expression in the eyes, variations of colors and complex patterns.

The third of Agrippa's elemental states is that of the 'Infallible Medium'. It is the chaos, the unforeseen, the accident, the 'wind of change' against which we rage and from which we gain inspiration.

In the 'Three Books of Occult Philosophy' by Henry Cornelius Agrippa Book 1 chapter 4 Agrippa describes the Infallible Medium as ". . . twice compounded, various, and changeable one into the other. . . . In them is, by means of certain numbers, degrees and orders, the perfection of every effect in what thing so ever, whether natural, celestial, or supercelestial; . . . from these, through them, proceed the bindings, loosings, and transmutations of all things, the knowing and foretelling of things to come, also the driving forth of evil, and the gaining of good spirits."

R.A. Schwaller de Lubicz in 'The Temple of Man' Chapter 2, last paragraph says: "Duration or procreation is not indispensable with respect to the original Cause, but it imposes itself upon the creature by 'imitation'; it is the accident, and, in relation to the absolute order of shadowless light that is the self-contemplation

of the causal consciousness, this duration or genesis is disorder and the fracturing of causal Unity into quantity.”

Shakespeare is most straight forward and simple and has Othello say in Act 3 scene 3 “Excellent wretch! Perdition catch my soul, But I do love thee! and when I love thee not, Chaos is come again.” Chaos is the lack of love or unity. Chaos is life itself that ever seeks reunion. Chaos is that medium by which, through perfecting by self-contemplation, comes the ‘transmutations of all things, the knowing and foretelling of things to come, also the driving forth of evil, and the gaining of good spirits.’ Chaos or the Infallible Medium is like holes in a flute that, when manipulated, change the notes being sent into the air. Once blown the note cannot be retrieved. Every thing we do or think or say goes into the accumulation of evolving Nature and it cannot be taken back. But it is there to be reckoned with, infallible, forever. If it’s a sour note, all we can do is try to override it or maybe soften it’s effect somehow. Shift our finger just a little to flavor the air passing through it a little sweeter, more in harmony with the symphony that we are.

Focused (2ב) Perception (200ר) One (1א) will (300ש)

consciousness (5ה) will (300ש) life (40מ)
Accumulation (50 מ y) evolve (6ו) Nature (406ה ת א)
One (1א) Perception (200ר) culminate (90צ)

Mirror (Focusing (2ב) Perception (200ר) One (1א) Elohim
(One (1א) expands (30ל) consciousness (5ה) manifesting
(10י) Life (40מ)) contains 5 holes, the zeros. The farther from
the primary 9 numbers the more chaos is introduced.

5 = consciousness (5ה) . The reflection of One’s expanded
consciousness manifesting life simultaneously necessitates chaos
and consciousness. Can’t have one without the other. Without
Chaos we would still be safe and warm under the sand at the
bottom of the sea. Chaos makes us struggle, makes us think and

makes us grow. Most importantly it is the only way we can come to know who we are.

We are a reflection of the One. We are the One looking for imperfections to be dealt with. And we are the ones that need to fix them. Thinking of the One expressing itself as notes or Perceivable frequencies, we are a convergence of many different notes in a specific frequency range, our life. Most of these notes we all have in common. Some notes come in that may increase the harmony or may mirror disharmony. We have the Will (earth) and the Consciousness (air) to temper that note (fire) and modify the life (water), to either augment or temper the incoming frequency.

One expanded consciousness = 36 ; A square where each side equals One expanded Consciousness creates a space equal to 1296. Only 1 off of One expanded consciousness manifests life. One reciprocal consciousness wills the life of the accumulated evolving Nature of the One = 1295

One (1א) expanded (30ל) consciousness (5ה) = 36
(manifest (10י) life (40מ) One (1א) reciprocal (400ת) = 1.414

gives a diagonal of 51 = manifest (10י) life (40מ) One (1א)
One expanded consciousness times manifest life of One's
reciprocal equals the Manifest life of One. Primary consciousness
interacting with the manifest life of its reciprocal is the
manifested life of the One.

circle gives dimension and a border creating form.

The letters in *accumulation of evolving Nature* -Accumulation
(מ 50) evolve (6ו) Nature (ה ת א 406) equal 462 ; 289 x1.6
phi=462 This is indicating that the act of *mirroring by Elohim*
culminates in the *Accumulation of evolving Nature* at a rate of phi
. Phi is harmonious growth.

The act of mirroring Elohim prompts the act of accumulating
evolving Nature. Pi gives Life form. Life represents the element
of Water and is represented by the letter נ. Life grows and
expresses itself through the symmetry of Phi.

Phi x Pi = 1.61 x 3.1415 = 5.06 = Consciousness (5ה) is the unification of pi's form and phi's growth.

The torus is implied by the alternating of focusing and expanding in this first verse. The depth of the torus is Beth b focus (2) the first letter of the text. Duality is space, perspective, focus, the probing intellect, all that is conducive to evolving Nature. One perceives. It's Perception corresponds to it's nature, which is to focus .The width of the over all sphere is Lamad expansion 1 (30) or the blossoming outward from the center.

This develops a pattern of a torus which is the expansion (30) of a focused (2) concept. The Volume of this torus is the *consciousness of the One's Perception culminated.*(H' Aretz): consciousness (5ה) One (1א) Perception (200ר) culminate (צ 90) = 5+1+200+90=296

the torus, or the universe as we know, it is composed primarily of the One's conscious Perception.
