- A: Reflection
- B: Coalescence
- C: Sound
- D: Speech
- E: Seed to Will

1:2 Evolving Event’s fractal feelings reciprocate consciousness. Harmonic algorithm focuses the potential, evolving the aspiration willing the seed of Sound to expand speech. Individual manifests a Reciprocal potential. Life evolves the perception evolving aspiration. Elohim’s life Perceives aspiration’s speech of reciprocal conceptual expression of conscious receptivity.

A: Reflection

Evolving 1 (6) event 8 7 (6) fractal 3 7 (290)

In the first verse the One mirrors by focusing perception on itself. *Focused perception of the One = 203.*

The second verse begins with what is perceived by this focusing, its reflection, an evolving event fractal. *Evolving 1 (6) event 8 7 (6) fractal 3 7 (290) = 302*

*'A fractal is a never-ending pattern. Fractals are infinitely complex patterns that are self similar across different scales. They are formed by repeating a simple process over and over in an ongoing feedback loop.'*¹ We (a fractal) evolve through an event process, perception. Our configuration is dedicated to perception: sight, smell, taste and hearing. Every square inch of the body feels, we also must mention all the senses that we now group as intuition or psychic abilities. We perceive, collect and process all things 'One' (within our frame of reference), 'we are God looking at itself.' Not only are we what is reflected in the mirror, we are the mirror itself.

B: Coalescence

it becomes יהוהיהוה There are three significant names in this string. Ehieh (I Am that I Am) יהיה, and Jehovah יהוה and A I O (One Manifesting Evolution) Apophis, Isis and Osiris. Later in chapter one Ehieh and Jehovah appear with the letters in the correct order. This verse seems to be the origination of the ‘gods’ to be reflected later as the expression of the original.

“The **fine structure constant**, symbolized as α (alpha), is a fundamental physical constant that indicates the strength of the interaction between charged particles. It plays a crucial role in the realms of quantum mechanics and electromagnetism. Other names for the constant are the **coupling constant** or the **Sommerfeld constant** in honor of Arnold Sommerfeld who introduced it.”²

C: Sound

Notice what happened in verse 1. One א (1) expanded ש (30) consciousness ט (5) manifests י (10) Life ד (40) which forms the word Elohim, generally equated with the creators of life.

Expansion manifests Life. $30 + 10 = 40$.

Life expansion is Sound. $40 + 30 = 70$

Life ד (40) + expanded ש (30) = sound ש (70)

sound ש (70) expansion ש (30) = concept ש (100)

concept ש (100) x Pi (form) = 314

evolve ו (6) aspiration ט (8) Will ש (300) = 314 To see this as a circle, Concept is the diameter of a circle and evolving aspiration of the Will is the circumference.

The form of expanding sound is Will's evolving aspiration. Will's evolving aspiration is the same as sound's length and amplitude and frequency. Our Will to be more than we are, to aspire to be more perfect, more united, more beautiful is **the same as** the form of sound and vibration. They are the same thing. Consciousness (1+4=5) wills (300) the formed concept through the eternal object of Pi. (3.14)

D: Speech

$$\text{reciprocal } \curvearrowright (400) \text{ potential } \updownarrow (11) = 411$$

$$411/3.415(\text{Pi, form})=130; 130 = \text{Speech } \boxminus (80) \text{ Individual } \downarrow (50)$$

Speech of the Individual is the diameter of a circle and *reciprocal potential* is the circumference.

Individual expression automatically creates *potential reciprocation* through the function of Pi, an Eternal Object, a basic truth, an underlying Law.

$$\text{expansion } \curvearrowleft (30) \text{ Speech } \boxminus (80) \text{ Individual } \downarrow (50) \text{ manifest } \updownarrow (10) \text{ reciprocal } \curvearrowright (400) \text{ potential } \updownarrow (11)$$

$$\text{Life } \downarrow (40) \text{ evolve } \updownarrow (6) \text{ Perception } \updownarrow (200)$$

$$\text{expansion } \curvearrowleft (30) \text{ Speech } \boxminus (80) \text{ Individual } \downarrow (50) = 160$$

$$160 \times 1.61 (\text{Phi, action of natural growth}) = 257$$

$$\text{potential } \updownarrow (11) \text{ Life } \downarrow (40) \text{ evolve } \updownarrow (6) \text{ Perception } \updownarrow (200) = 257$$

The natural growth of an *individual expanded speech* is the *potential Life of evolving perception*.

An individual expresses itself by willing sound to flow from it outward with intent. This naturally grows into Life's evolving perception. Perception is another willed consciousness feeling these vibrations and putting meaning to it.

$$257 \times 1.61 = 411$$

$$\text{expansion } \curvearrowleft (30) \text{ Speech } \boxminus (80) \text{ Individual } \downarrow (50) \text{ manifest } \updownarrow (10) \text{ reciprocal } \curvearrowright (400) \text{ potential } \updownarrow (11)$$

$$\text{Life } \downarrow (40) \text{ evolve } \updownarrow (6) \text{ Perception } \updownarrow (200)$$

$$\text{reciprocal } \curvearrowright (400) \text{ potential } \updownarrow (11) = 411$$

The *evolving perception of potential life* grows into a *potential reciprocal* understanding.

$$\text{expansion } \curvearrowleft (30) \text{ Speech } \boxminus (80) \text{ Individual } \downarrow (50) \text{ manifest } \updownarrow (10) \text{ reciprocal } \curvearrowright (400) \text{ potential } \updownarrow (11)$$

$$\text{Life } \downarrow (40) \text{ evolve } \updownarrow (6) \text{ Perception } \updownarrow (200)$$

$$\text{manifest } \text{׳} (10) \text{ reciprocal } \text{ײ} (400) = 410$$

$$410 \times 1.61 = 660$$

$$\text{expansion } \text{ײ} (30) \text{ Speech } \text{ײ} (80) \text{ Individual } \text{ײ} (50) \text{ manifest } \text{׳} (10) \text{ reciprocal } \text{ײ} (400) \text{ potential } \text{ײ} (11)$$

$$\text{Life } \text{ײ} (40) \text{ evolve } \text{ײ} (6) \text{ Perception } \text{ײ} (200)$$

$$\text{Individual } \text{ײ} (50) \text{ manifest } \text{׳} (10) \text{ reciprocal } \text{ײ} (400) \dots \text{ Perception } \text{ײ} (200) = 660$$

Manifested reciprocal naturally grows into the individual manifesting reciprocal perception.

E: Seed to Will

Three underlying conditions of reality are Consciousness, Life and Perception. Reality here does not mean ‘physical reality’ but that reality in which we have our being, whatever the conditions.

$$\text{consciousness } \text{ײ} (5) \times \text{Life } \text{ײ} (40) = \text{Perception } \text{ײ} (200)$$

$$\text{To Manifest is to focus consciousness: } \text{Focus } \text{ײ} (2) \times \text{consciousness } \text{ײ} (5) = \text{manifest } \text{׳} (10)$$

$$\text{The seed is the result of focused manifestation: } \text{Focus } \text{ײ} (2) \times \text{manifest } \text{׳} (10) = \text{seed } \text{ײ} (20)$$

$$\text{Perception is the manifestation of the Seed: } \text{manifest } \text{׳} (10) \times \text{seed } \text{ײ} (20) = \text{Perception } \text{ײ} (200)$$

$$\text{The individual is consciousness manifested: } \text{consciousness } \text{ײ} (5) \times \text{manifest } \text{׳} (10) = \text{Individual } \text{ײ} (50)$$

$$\text{Life is the aspiration of Consciousness: } \text{consciousness } \text{ײ} (5) \times \text{aspiration } \text{ײ} (8) = \text{Life } \text{ײ} (40)$$

$$\text{The Will is the evolution of the Individual: } \text{evolve } \text{ײ} (6) \times \text{Individual } \text{ײ} (50) = \text{Will } \text{ײ} (300)$$

$$\text{The Will is also the feelings within the seed: } \text{seed } \text{ײ} (20) \times \text{feelings } \text{׳} (15) = \text{Will } \text{ײ} (300)$$

The consciousness of Elohim is the harmonic algorithm of focused potential:

Elohim אֱלֹהִים (86) x *consciousness* אָ (5) = *Harmony* אָ (405) *algorithm* אָ (12) *Focused* אָ
(2) *potential* אָ (11) = 430

Sound is a consciously focused algorithm: (*algorithm* אָ (12) *Focused* אָ (2)) x *consciousness* אָ (5)
= *sound* שָׁ (70)
